ASCENT PLUS GTX®

A perfect blend between stability, lightness, tradition and technology. The special over injected frame W.F.W. developed by CRISPI® makes ASCENT PLUS GTX® the perfect boot for comfortable and wordless walks.

Upper in water-repellent Suede and high resistance fabric

GORE-TEX® Performance Footwear Lining

Insole with differentiated structure and anti-torsion insert

Removable Footbed: CRISPI® Air Mesh + Felt + Active Carbons. Outstanding Breathability and antiperspiration - antiodour action. The CRISPI® 3D construction, transports moisture away leaving the foot dry in every moment

Toe and heel stitched rubber protection

Vibram® rubber sole with micropore shock absorbing midsole

EN - CRISPI® BOARD LASTING - Tradition combined with Technology. The perfect connection between torsion rigidity and flexibility achieved thanks to a mechanical process that wraps the comfortable and soft part of the upper to the insole frame.

EN - CRISPI® WRAPPING FRAMEWORK - The W.F.W. system developed by CRISPI® is a structural over injection of a plastic polymer fused on the external part of the upper. This fusion becomes part of the shoe design. Technical Features: • Structural solidity • Lightness and comfort • Protection against external impacts • Increasing of transpiration thanks to the "Breathable areas" • Wrapping Fastening System for a perfect foot position and anatomical wrapping • Structural support on walking phase.
